Subject: Felicitations to the Fifty-fourth Congress of the Communist Party of Britain.

Dear Comrades,

At a time when the working peoples of the world are facing the economic woes and social chaos which ensue from the rabid attempts of the imperialists to save capitalism from its doom, we, comrades from a South-east Asian nation hail the congress of comrades who are struggling against capitalism in Europe, the continent where most of the world's capitalist nations are situated.

The post-Cold War contention and re-division of regions under their influence among the big powers, instead of coming to an end has in fact become ever more intense and treacherous. New problems of war refugees and their resettlement, undeniable outcomes of their imperialist rivalry, have reached unprecedented heights in history. At a time when the US imperialist tries to focus its concentration of military power in the China Seas, Burma, a country that offers western outlets to China, is also being drawn into the maelstrom. Being sandwiched between the world's two most populous nations and situated at a crucial point of one of the world's most important sea lanes, powerful nations never lose sight of our country's politics, and now the manipulative designs of western nations are overtly going full swing in Burma's politics.

At a time like this, the struggles and movements of the peoples of

Europe to rein in the imperialists are of utmost value to the all the peoples of the world. Just like the time during the Vietnam War, we must unite to thwart the efforts of the imperialist forces from fanning war around the world.

In our country, as the people have come to realize the inevitable limitations of the new elected government, their interest and inclination towards Marxism and Leftism has gained momentum. We shall make use of this opportunity and revitalize our party's work with the peoples of our nation.

Success to the Fifty-fourth Congress of the Communist Party of Britain!

Long Live the Fraternal Relationship between the Communist Party of Britain and the Communist Party of Burma!
